Squeegee Resharpener System...

The Squee-Juvenator Resharpener System by Pleiger is new and revolutionary.

With minimal effort, a square-cut squeegee can be resharpened with incredible precision.

A standard Stanley utility blade (available in most hardware stores) provides a sharp, clean edge for the screen printer. Replacement of the sharpening blade is simple and fast. It is virtually effortless, quick and reduces downtime.

The system is of lightweight construction and requires no electricity or compressed air. It is supplied with all the necessary tools and hardware, in addition to a detailed instruction manual.

No special operating skills or special training is required.

**Simple yet Superior
technology...**

MAGNIFIED VIEW OF GROUND EDGE

Previously available sharpening systems such as belt or stone wheel grinding techniques, are time consuming and result in a coarse finish, as shown in this magnified picture to the left. This coarse edge produces greater surface area and results in an accelerated solvent attack.

The magnified picture on the right is the clean cut, long lasting edge that is obtained by using the Pleiger Squeegee Resharpener System. Maximum life of the squeegee will be obtained because every cut creates minimum imperfections in the edge, and ultimately less points for the ink to attack. You will also notice that a sharper print edge creates better images. Because of the superior edge immediately after sharpening, you will get more impressions between resharpenings and will not have to sharpen as often.

TECHNICAL DATA

Nominal / Standard Sizes	24"	48"	72"
Model Number	3145-1-24	3145-1-48	3145-1-72
Maximum Cut Length	27"	51"	75"
Machine Size (Width x Height x Length)	5"x5"x38"	5"x5"x62"	5"x5"x86"
Crated Size (Width x Height x Length)	10"x10"x45"	10"x10"x71"	10"x10"x93"
Machine Weight	35 lbs.	70 lbs.	100 lbs.
Shipping Weight	45 lbs.	90 lbs.	130 lbs.
Recommended Cut to be Removed			
Shore 60A	.10"	.10"	.10"
Shore 70,80,90A	.07"	.07"	.07"
Multi Durometer	.07"	.07"	.07"

Other sizes (up to 128") are available upon request. Units are supplied standard as table top units. Wallmount brackets and/or Floor Stand are available as optional equipment.
